

# IfM Briefing Day

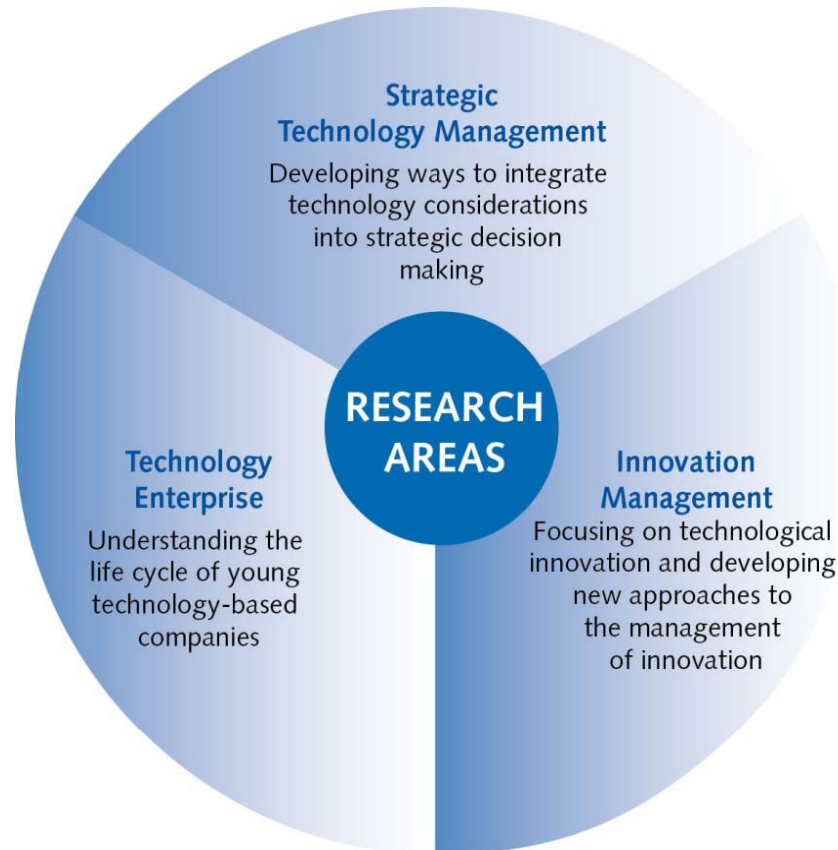

## Collaborative Opportunities in Technology and Innovation Management

**Tuesday 21 May 2013**

David Probert, Rob Phaal, Clare Farrukh,  
Simon Ford, Clive Kerr, Man Hang Yip, Clemens Chaskel

# CTM research

## Objectives:

- Integrated understanding of science, engineering and business
- Better management of technology as a resource
- Help for managers facing practical problems

# Agenda

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |
| • The Strategic Technology and Innovation Management Consortium                         | Rob Phaal       |
| - Lightweighting innovation strategy  | Clare Farrukh   |
| - Organising the front-end of innovation  | Simon Ford      |
| - Customisable multi-factor scoring system for project selection                        | Rob Phaal       |
| • Visual communication of strategy  | Clive Kerr      |
| • Multiple stakeholder engagement in early-stage new product-service system development | Man Hang Yip    |
| • Towards an integrated technology strategy   | Clemens Chaskel |
| • Questions and discussion  | All             |

# Agenda

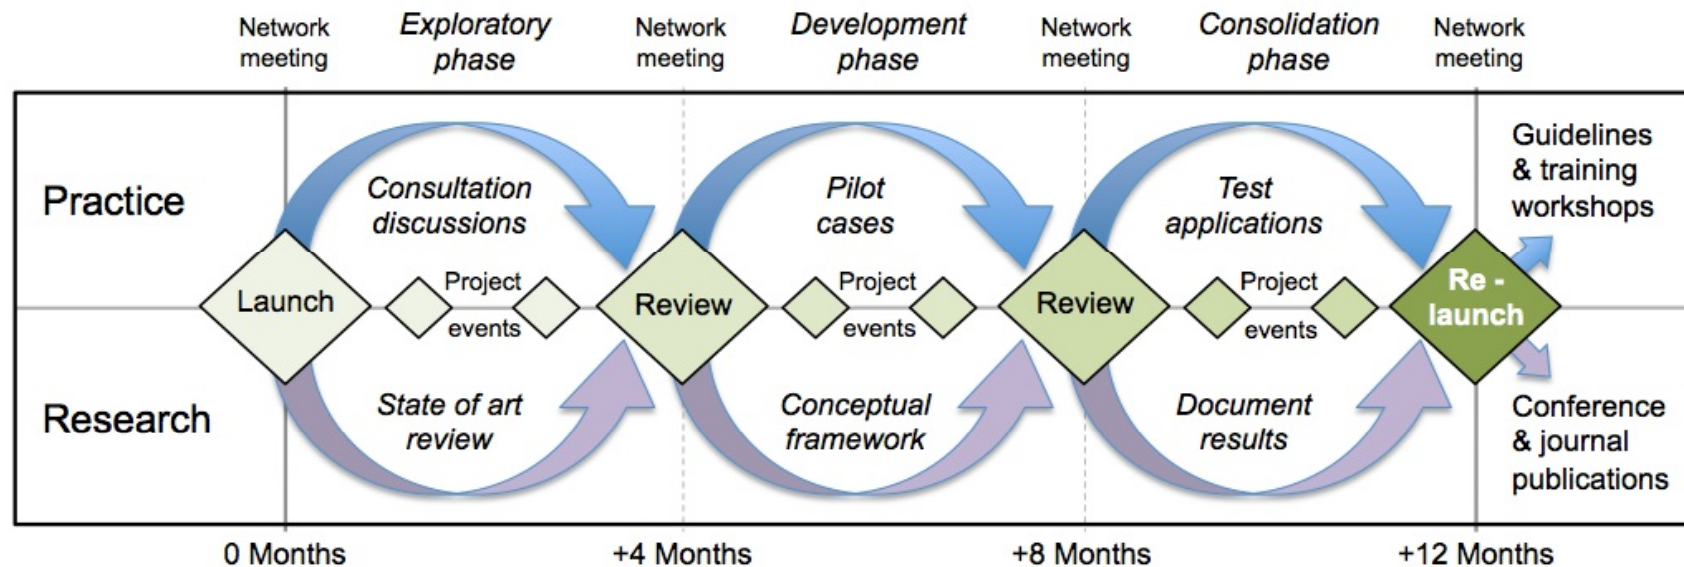

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |
| • The Strategic Technology and Innovation Management Consortium                         | Rob Phaal       |
| - Lightweighting innovation strategy  | Clare Farrukh   |
| - Organising the front-end of innovation  | Simon Ford      |
| - Customisable multi-factor scoring system for project selection                        | Rob Phaal       |
| • Visual communication of strategy  | Clive Kerr      |
| • Multiple stakeholder engagement in early-stage new product-service system development | Man Hang Yip    |
| • Towards an integrated technology strategy   | Clemens Chaskel |
| • Questions and discussion  | All             |

# Strategic Technology & Innovation Management (STIM) Consortium

A practice-oriented research and networking collaboration between industrial partners and the Centre for Technology Management, delivering a combination of practical and academic outputs

# STIM – an annual rolling programme

## 2013 Research Portfolio:

1. Light weighting innovation strategy: roadmap-portfolio process toolkit
2. Organising the front-end of innovation
3. Articulating strategic content: a template-based approach
4. De-risking projects early
5. Customisable multi-factor scoring system for project selection
6. Intelligence - how to evaluate information?
7. Technology leadership and deployment – sharing best practice

# Agenda

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |
| • The Strategic Technology and Innovation Management Consortium                         | Rob Phaal       |
| - Lightweighting innovation strategy  | Clare Farrukh   |
| - Organising the front-end of innovation  | Simon Ford      |
| - Customisable multi-factor scoring system for project selection                        | Rob Phaal       |
| • Visual communication of strategy  | Clive Kerr      |
| • Multiple stakeholder engagement in early-stage new product-service system development | Man Hang Yip    |
| • Towards an integrated technology strategy   | Clemens Chaskel |
| • Questions and discussion  | All             |

# Strategic Technology & Innovation Management Consortium

## Light Weighting Innovation Strategy: Roadmap-Portfolio Process Toolkit

21 May 2013

Clare Farrukh      [cjp22@cam.ac.uk](mailto:cjp22@cam.ac.uk)  
Centre for Technology Management

# Aims & deliverables

*What?* To develop and test a light weighted approach to support innovation strategy development, aimed at smaller companies, which may also find utility within large organisations.

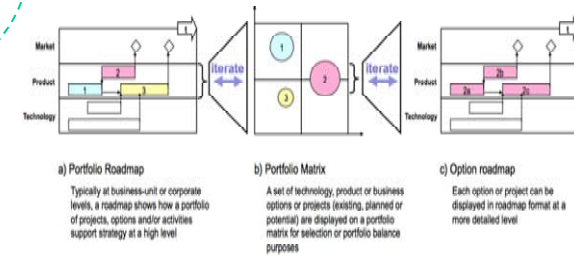

*Why?* Existing tools for aligning technology investments with business objectives (critical for successful innovation) are often perceived as heavy weight/resource hungry, rather than dynamic, easy to operate and with tangible value.

# Ongoing cycle

OPPORTUNITY TITLE?	Overall summary description of product/process/service/system opportunity	(Author's initials)
WHAT	What are the unique/valuable features of the opportunity?	
WHY	Why should we invest? E.g. Market potential/strategic benefits	
HOW	How can we realise/do it? E.g. Technology/resources	
WHEN	Over what time frame? Short/Medium/Long	

Opportunity definition  
(designed post-its)

New opportunities

Portfolio roadmap  
(permanent display)

Portfolio by triage (dot voting)

Explore and score "top opportunities"  
(to inform roadmap & selection criteria)

# Summary

- We are looking for pilot companies:
  - Short workshop to trial opportunity focused approach
  - Feedback on templates and process
- We would value your input!

# Agenda

- |   |                   |
|---|-------------------|
| • CTM Introduction  | David Probert     |
| • The Strategic Technology and Innovation Management Consortium                         | Rob Phaal         |
| - Lightweighting innovation strategy  | Clare Farrukh     |
| - <b>Organising the front-end of innovation</b>   | <b>Simon Ford</b> |
| - Customisable multi-factor scoring system for project selection                        | Rob Phaal         |
| • Visual communication of strategy  | Clive Kerr        |
| • Multiple stakeholder engagement in early-stage new product-service system development | Man Hang Yip      |
| • Towards an integrated technology strategy   | Clemens Chaskel   |
| • Questions and discussion  | All               |

# Organising the front-end of innovation

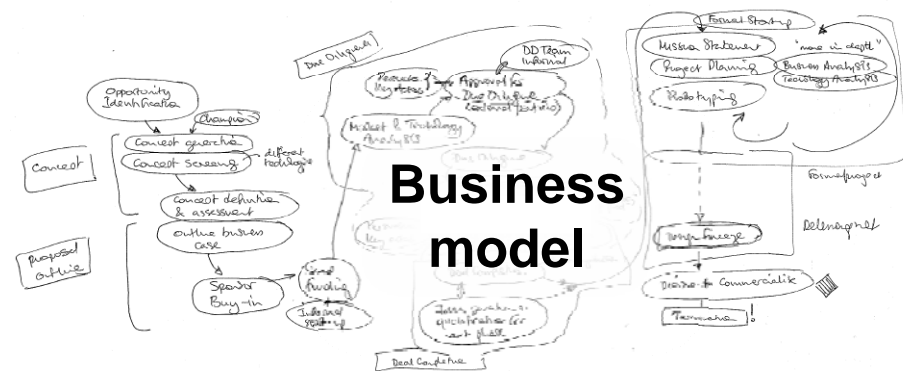

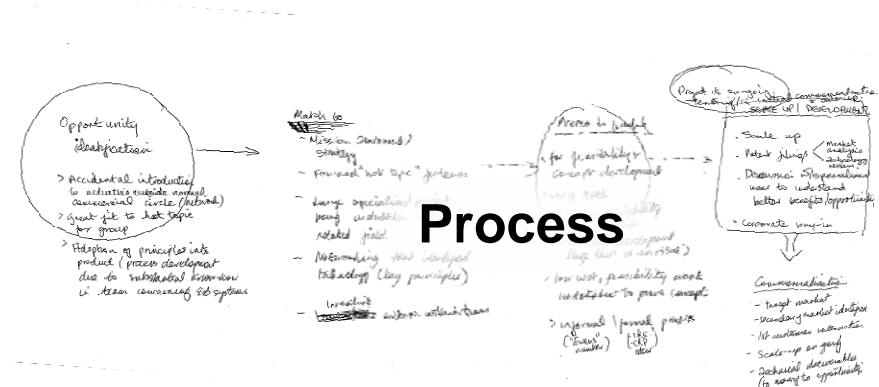

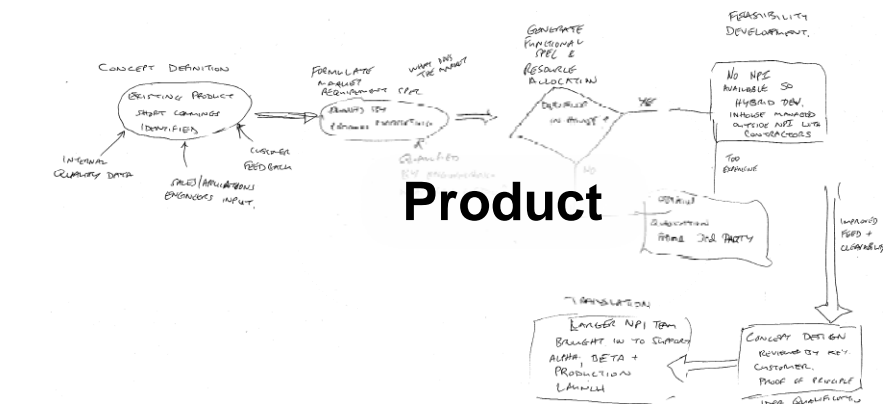

**Simon Ford**  
**[sjf39@cam.ac.uk](mailto:sjf39@cam.ac.uk)**

**Front-end**

# What does the front-end of innovation look like?

# Project objectives

- **Identify how to improve the organisation of the front-end of innovation**
- **Develop a front-end of innovation review process**

## Where you come in...

- **Provide insights into the front-end of innovation through interviews**
- **Help to develop and pilot the front-end of innovation review process**

# Agenda

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |
| • The Strategic Technology and Innovation Management Consortium                         | Rob Phaal       |
| - Lightweighting innovation strategy  | Clare Farrukh   |
| - Organising the front-end of innovation  | Simon Ford      |
| - Customisable multi-factor scoring system for project selection                        | Rob Phaal       |
| • Visual communication of strategy  | Clive Kerr      |
| • Multiple stakeholder engagement in early-stage new product-service system development | Man Hang Yip    |
| • Towards an integrated technology strategy   | Clemens Chaskel |
| • Questions and discussion  | All             |

# Selecting early stage projects

**Rick Mitchell, Rob Phaal & Nicky Athanassopoulou**

# Challenge of early stage valuation

- “... over-reliance on strictly financial data and criteria may lead to wrong portfolio decisions, simply because financial data are often wrong!”

*Cooper et al, 1998*

- And yet decisions must still be made... So, assess project against several criteria known to be correlated with success, as part of a portfolio approach:
  - *e.g. Product differentiation, growth market, leverage of core skills*
- But, limited guidance on how to design / customise such approaches in practice...

This project aims to develop and pilot practical & efficient methods for this

# How to design a scoring tool for a particular purpose?

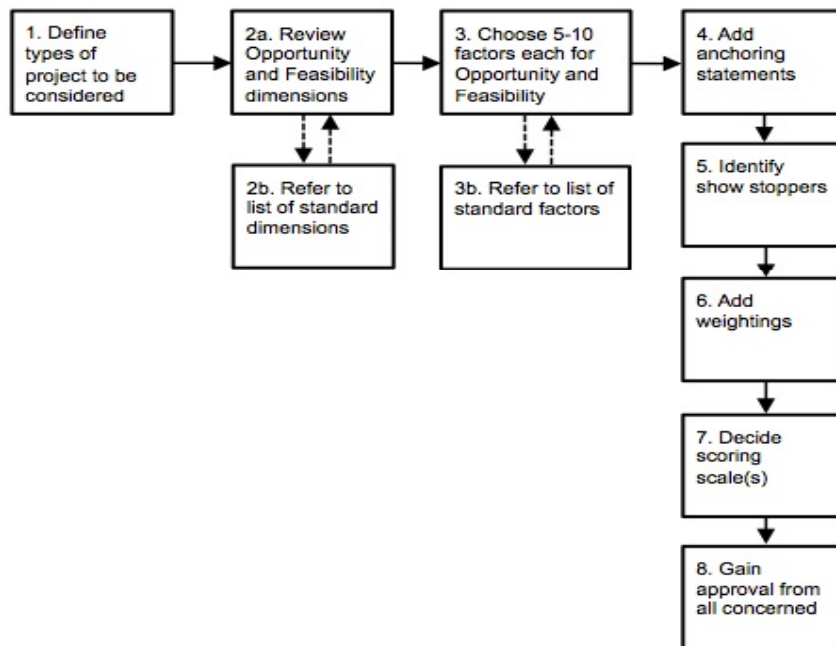

- A logical way is required to:
  - Select the factors
  - Create the score
  - Deal with risk and uncertainty
  - Manage the process
- The method must be able to evolve coherently as projects mature

# Approach

The size of the potential *Opportunity*, and how *Feasible* it is for the organisation, are treated as independent aspects

## Design process

## Option depiction

# Workshop process pilots

# Agenda

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |

# Stakeholder engagement in new product-service system (PSS) development

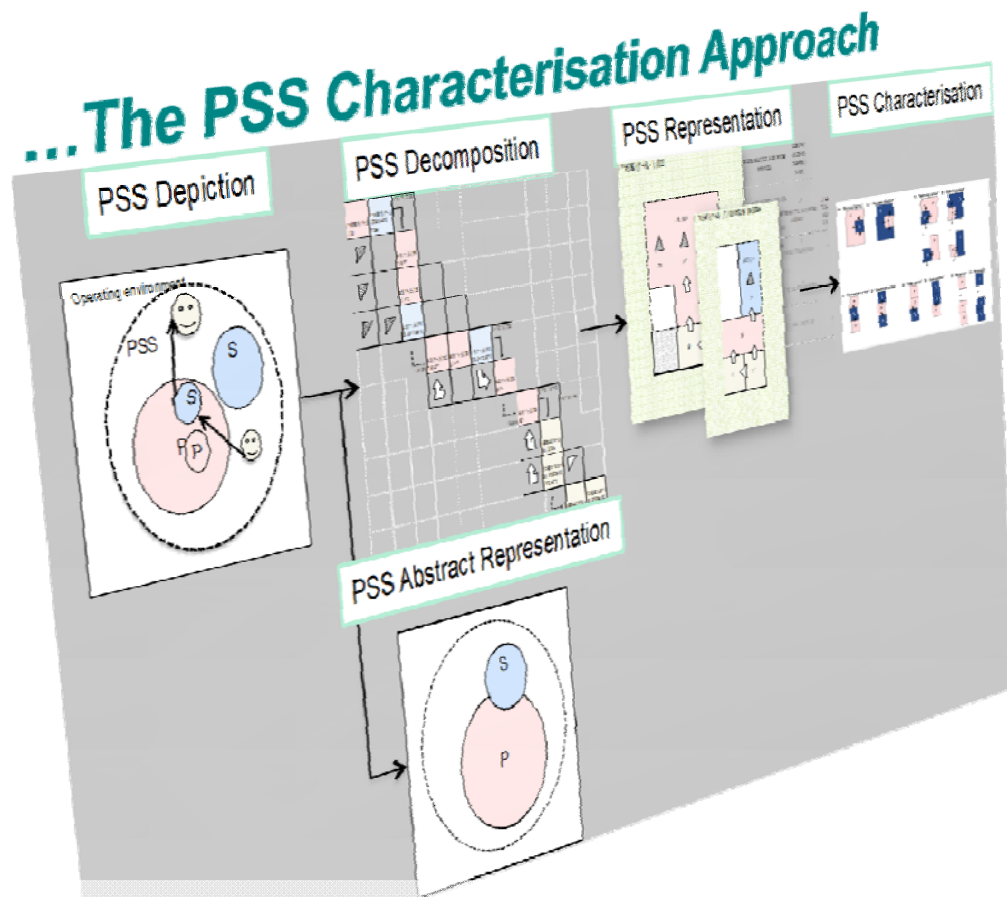

*Context: new PSS development*

*Perspective: manufacturers – new product/service/PSS development team*

# How to classify PSS?

- ✓ Facilitates a common understanding of the new development
- ✓ Provides a common basis for comparing the complexity of different development ideas

**Now inviting practitioners with new product/service development experience to try & feedback on the technique**

# Agenda

- |   |                 |
|---|-----------------|
| • CTM Introduction  | David Probert   |

# Integrated technology strategy

**Tuesday 21 May 2013**

Clemens Chaskel

[cdc31@cam.ac.uk](mailto:cdc31@cam.ac.uk)

# What is integrated technology strategy?

A strategy that closely links  
technology, product and corporate planning.

Processes?

Management tools?

**...but how do  
*you* link  
technologies  
and products  
with corporate  
planning?**

Hierarchies?

Lots of other  
considerations...!

Communication?

# Case studies

How do *you* ensure that your strategy is aligned to your firm's capabilities?

Home appliances

Aerospace & Defense

Transportation

Printing solutions

Industrial products

Automotive

Toys

Defense systems

You?

Starting soon

# Potential case study approach

## Phase 1: Baseline data

### Establishment of

- Hierarchies and structures
- Current practices
- Management processes
- Support tools

## Phase 2: Further data collection

- Analysis of stakeholder involvement
- Analysis of processes and tools
- Identification of improvement opportunities.

## Phase 3: Data validation

- Improvement concept development and validation.

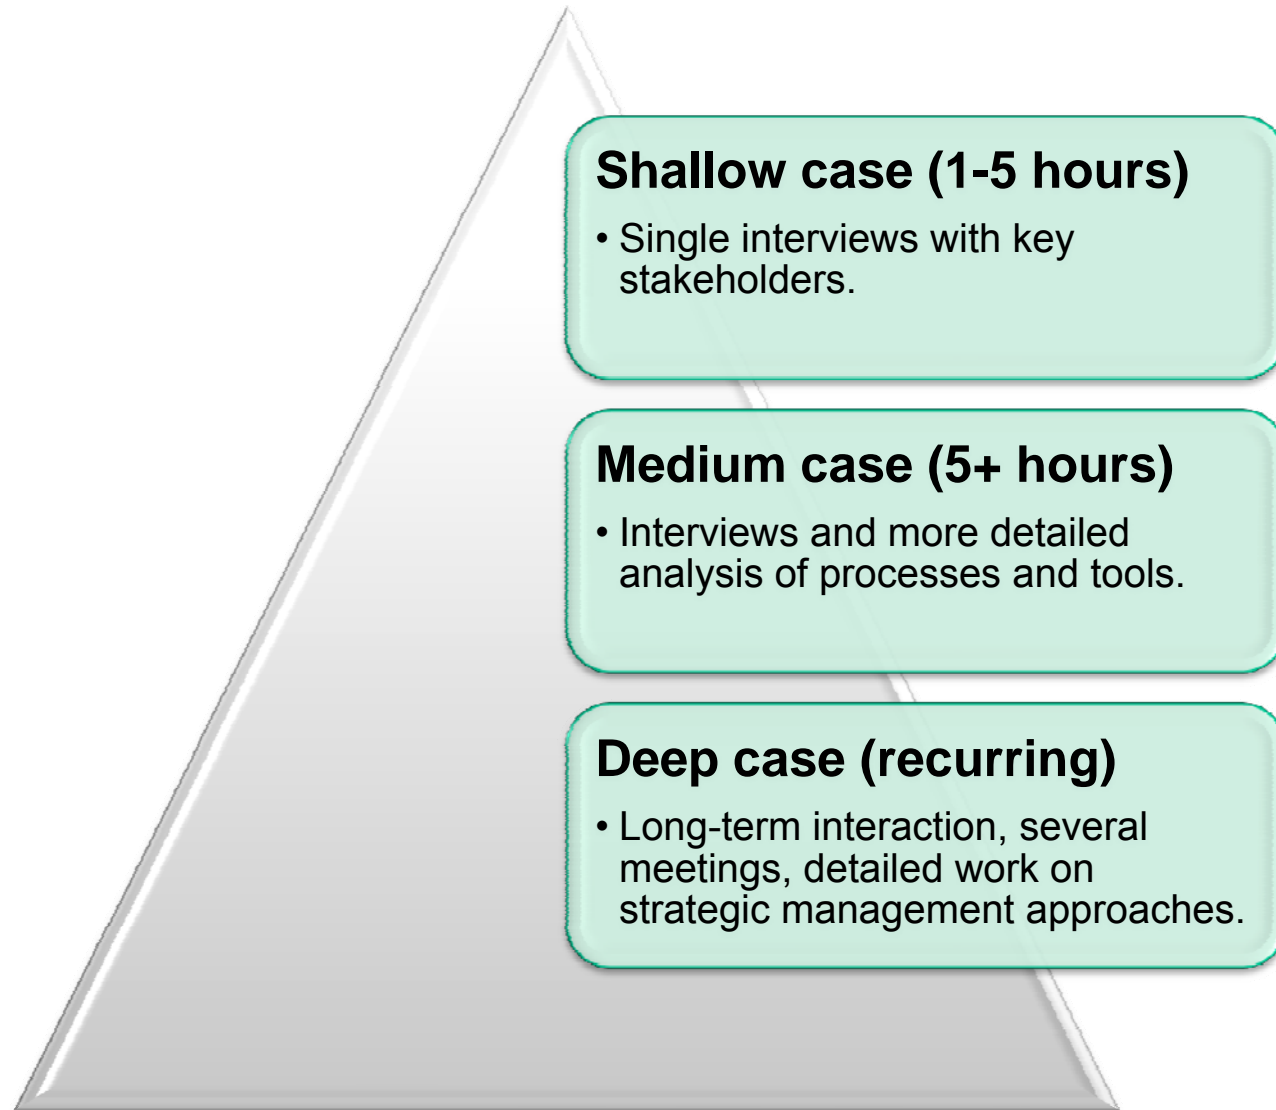

## Phase 4: Wrap-up

- Presentation of findings and delivery of project report.

### *... and later on:*

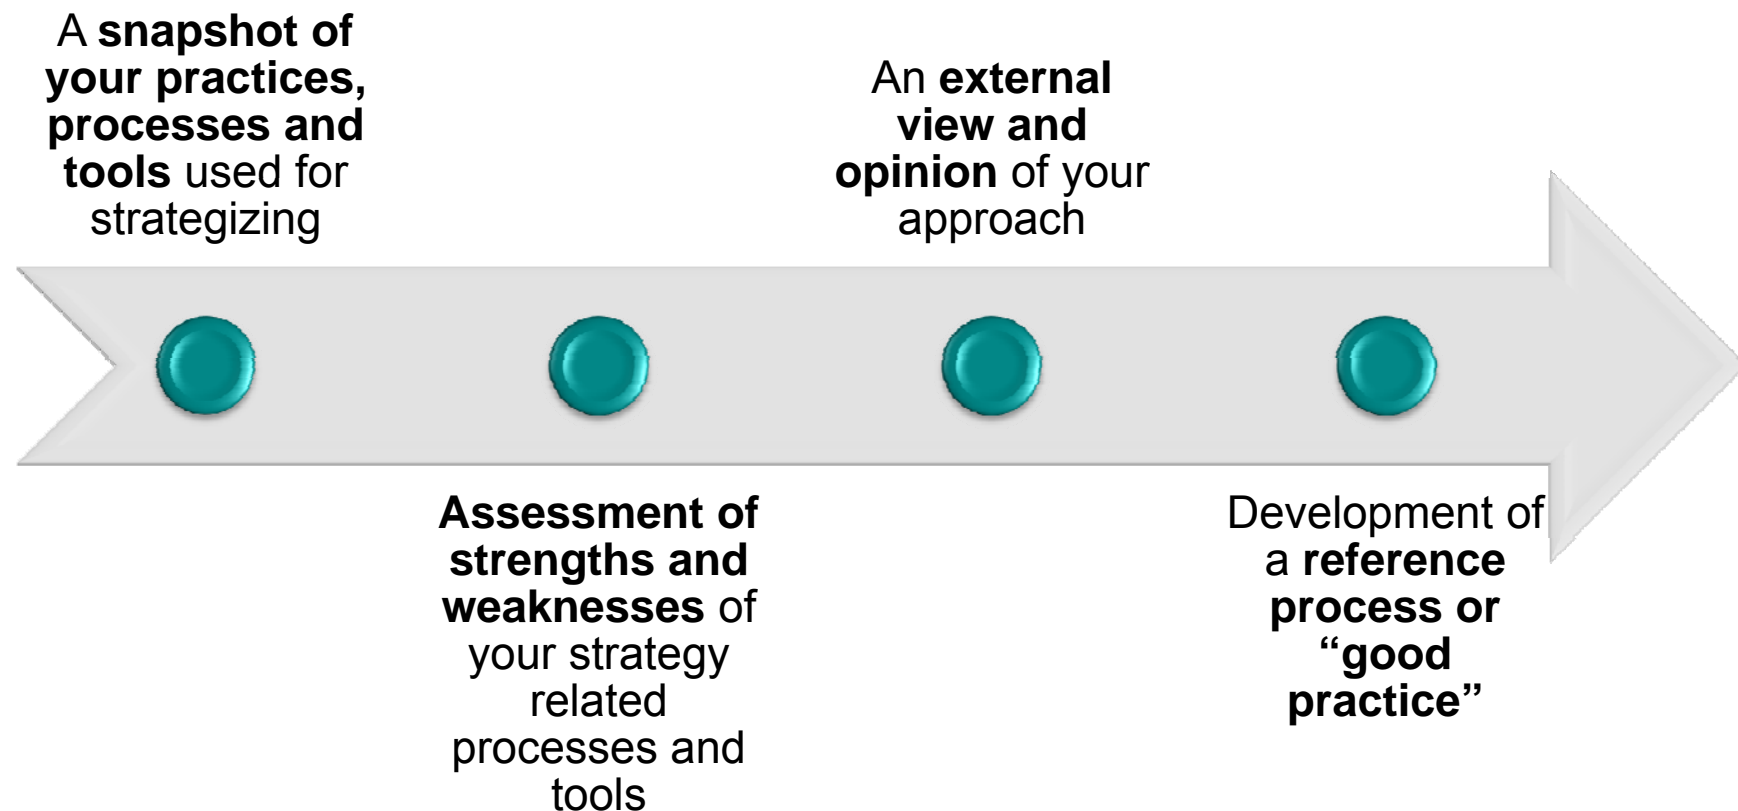

- Integration of findings into study
- Presentation of research results

# Interaction options

# Deliverables

**If you would like to get involved.....**

**Clemens Chaskel**
